Foreword ix

Preface xiii

Frank H. Spedding Award citation xv

Early days in the spectroscopy of tripositive rare earth ions* 1
B. R. Judd (Baltimore, MD, U.S.A.)

1. APPLIED PHYSICS AND CHEMISTRY

Manufacture of Nd–Fe–B permanent magnets by rapid solidification† 7
J. J. Croat (Anderson, IN, U.S.A.)

Exchange and magnetostrictive effects in rare earth superlattices† 17
J. J. Rhyne, R. W. Erwin (Gaithersburg, MD, U.S.A.), J. Borchers, M. B. Salamon, R. Du and C. P. Flynn (Urbana, IL, U.S.A.)

Lead–rare-earth–chalcogenides grown by molecular beam epitaxy† 35
D. L. Partin (Warren, MI, U.S.A.)

Rare earth fiber lasers† 45
E. Snitzer (Cambridge, MA, U.S.A.)

Preliminary study on the vertical distribution of rare earths in an Egyptian phosphorite deposit 59
A. A. Fakhry, K. M. El-Behery, M. A. Eid and A. Darder (Cairo, Egypt)

$PrCo_5$-based high-energy-density permanent magnets 67
E. M. T. Velu, R. T. Obermyer, S. G. Sankar and W. E. Wallace (Pittsburgh, PA, U.S.A.)

Rare earths for materials corrosion protection. 73
F. M. Seon (Aubervilliers, France)

Heavy minerals, including monazite, in Egypt's black sand deposits. 79
J. B. Hedrick (Washington, DC, U.S.A.) and L. Waked (New York, NY, U.S.A.)

Effects of rare earth alloys on structures and properties of grey cast iron 85
D. Sheng, H.-S. Huang and J.-C. Liu (Beijing, China)

High-field magnetic properties of hot compacted extruded RE–Fe–B magnets 91
B. M. Ma, V. K. Chandhok, E. B. Boltich, S. G. Sankar and W. E. Wallace (Pittsburgh, PA, U.S.A.)

2. SYNCHROTRON SOURCES, SPECTROSCOPY, CRYSTALLOGRAPHY, SURFACES AND CATALYSIS

Valence characterization and *in-situ* kinetics of oxygen uptake and removal in high T_c superconductors by X-ray absorption spectroscopy† 97
A. Fontaine, A. M. Flank, E. Dartyge, P. Lagarde, H. Tolentino, G. Tourillon (Orsay, France), A. Bianconi (Rome, Italy), G. Krill (Vandoeuvre-les-Nancy, France) and M. Maurer (Pont-à-Mousson, France)

*Frank H. Spedding Award Address.
†Invited paper.

© Elsevier Sequoia/Printed in The Netherlands

Sychrotron X-ray scattering studies of rare earth metals† 109
D. Gibbs (Upton, NY, U.S.A.)

Electronic structure of the quenched superconductivity materials $Y_{1-x}Pr_xBa_2Cu_3O_{7-\delta}$† 121
J. S. Kang, B. W. Lee, M. B. Maple (La Jolla, CA, U.S.A.), Z.-X. Shen, J. J. Yeh, W. E. Spicer, I. Lindau (Stanford, CA, U.S.A.), J. W. Allen (Ann Arbor, MI, U.S.A.) and W. P. Ellis (Los Alamos, NM, U.S.A.)

Band dispersion, photoemission satellites, and Fermi liquid behavior at $T > T_k$ in 5f heavy fermion systems† 133
A. J. Arko (Los Alamos, NM, U.S.A.), D. D. Koelling, B. D. Dunlap (Argonne, IL, U.S.A.), C. Capasso and M. del Giudice (Minneapolis, MN, U.S.A.)

New paradoxes of spin-pairing energy in gadolinium(III). 147
C. K. Jørgensen (Geneva, Switzerland)

Electronic structure and coordination geometry of Pr^{3+} doped rare earth trichlorides 151
W. Urland (Hannover, F.R.G.)

Laer-induced fluorescence studies of europium extractant complexes in organic phases. 159
J. V. Beitz and J. C. Sullivan (Argonne, IL, U.S.A.)

Optical study of the $Y_3Ga_5O_{12}$–$Pr_3Ga_5O_{12}$ system 167
E. Antic-Fidancev, M. Lemaitre-Blaise, P. Care, P. Porcher (Meudon-Bellevue, France) and J. C. Krupa (Orsay, France)

Structure and absorption and fluorescence spectra of $Eu(PyNO)_8(ClO_4)_3$. 173
L. C. Thompson and S. C. Kuo (Duluth, MN, U.S.A.)

Omputer simulation of the ^5D_J levels of $4f^6$, Eu^{3+} 181
O. K. Moune and P. Caro (Meudon, France)

Normal vibration analysis of europium(III) acetate hydrate I — the *NORVIB* program 187
Y.-S. Yang, Q.-H. Zhang and L. Luo (Guangzhou, China)

Spectroscopic studies of $PrCl_3$ and $PrBr_3$ in the solid state. 193
W. R. Wilmarth (Knoxville, TN, U.S.A.), G. M. Begun and J. R. Peterson (Oak Ridge, TN, U.S.A.)

Interpretation of tetravalent actinide spectra 201
W. T. Carnall, G. L. Goodman, C. W. Williams, S. Lam and G. M. Jursich (Argonne, IL, U.S.A.)

Intensity parameters for Eu^{3+} luminescence — tests of the superposition model. . . . 207
D. K. T. Chan and M. F. Reid (Hong Kong)

Crystal-field and superposition-model analyses of Pr^{3+}–LaF_3 in C_2 symmetry 213
Y. Y. Yeung and M. F. Reid (Hong Kong)

Ab-initio calculation of intensity parameters for the system Pr^{3+}–Cl^- 219
M. F. Reid, B. Ng and D. J. Newman (Hong Kong)

Radiative transitions and lifetimes of Pr(III) in tellurite glasses. 223
M. Eyal, R. Reisfeld (Jerusalem, Israel), C. K. Jørgensen (Geneva, Switzerland) and C. Numan (Espoo, Finland)

Improved pulse operation of Ho(III) in YAG and YLF codoped by Tm(III) and Er(III). 227
Y. Kalisky (Beer-Sheva, Israel) and R. Reisfeld (Jerusalem, Israel)

†Invited paper.

Thermoluminescence of rare earth doped BaFCl crystals 233
J.-H. Lin and M.-Z. Su (Beijing, China)

Synthesis and characterization of some PSL phosphors 241
M.-Z. Su, Y.-J. Wang, W. Zhao and Z.-F. Song (Beijing, China)

Interactions of electronically excited tetraphenyl-porphyrin (TPP) with trivalent lanthanide ions in DMF 247
D. H. Kreszowski and J. Chrysochoos (Toledo, OH, U.S.A.)

Cross-relaxation of the $^1G_4$ state of Tm^{3+} in PCl_3:$SnCl_4$ 253
J. Chrysochoos and A. H. Qusti (Toledo, OH, U.S.A.)

Optical and photoredox properties of small colloidal semiconductor particles in the presence of trivalent lanthanide ions 259
Y. F. Lee, M. Olshavsky and J. Chrysochoos (Toledo, OH, U.S.A.)

Spectral studies of neodymium complexes containing tetramethylurea (TMU) as ligand 267
L. B. Zinner, H. F. Brito, G. Vicentini (Sao Paulo, Brazil) and A. B. Nascimento (Paraiba, Brazil)

Structural and fluorescence studies of compounds with general formula $[Ln(DMA)_3(H_2O)_6](CF_3SO_3)_3$ (DMA ≡ *N,N*-dimethylacetamide, Ln ≡ La–Tb) 273
R. W. Becker (Parana, Brazil), E. E. Castellano, G. Vicentini and L. B. Zinner (Sao Paulo, Brazil)

Polarized absorption spectra of hexakis(antipyrine)lanthanide(III) tri-iodide crystals: centrosymmetric-to-non-centrosymmetric phase transitions 281
C. K. Jayasankar and F. S. Richardson (Charlottesville, VA, U.S.A.)

Phenomenological spin-correlated crystal-field analyses of energy levels in Ln^{3+}:$LaCl_3$ systems 289
C. K. Jayasankar, F. S. Richardson (Charlottesville, VA, U.S.A.) and M. F. Reid (Hong Kong)

Crystal field analysis and electric dipole intensity parameters for holmium in $Na_3[Ho(oxydiacetate)_3]\cdot 2NaClO_4\cdot 6H_2O$ 297
D. M. Moran, A. de Piante and F. S. Richardson (Charlottesville, VA, U.S.A.)

Circular dichroism of erbium(III) in trigonal $Na_3[oxydiacetate)_3]\cdot 2NaClO_4\cdot 6H_2O$ 305
K. A. Schoene and F. S. Richardson (Charlottesville, VA, U.S.A.)

Comparison of crystal field parameters for $Ln(C_2H_5SO_4)_3\cdot 9H_2O$ and $Na_3(Ln(C_4H_4O_5)_3)\cdot 2NaClO_4\cdot 6H_2O$ systems 311
R. M. Hammond, M. F. Reid and F. S. Richardson (Charlottesville, VA, U.S.A.)

Optical activity of $Na_3[Dy(oxydiacetate)_3]\cdot 2NaClO_4\cdot 6H_2O$ 321
D. H. Metcalf and F. S. Richardson (Charlottesville, VA, U.S.A.)

Investigation of the structure of phosphorus oxynitride glasses by local structural probes 327
L. Boukbir, R. Marchand, Y. Laurent (Rennes, France), J.-C. Zhang, G. Le Flem and C. Parent (Talence, France)

Luminescence of the Cu^+ ion in $CuLaO_2$ 333
J. P. Doumerc, C. Parent, J.-C. Zhang, G. Le Flem (Talence, France) and A. Ammar (Marrakesh, Morocco)

Energy and intensity parametrization of the Nd^{3+}–$LiYF_4$ spectrum 339
C. Görller-Walrand, L. Fluyt (Heverlee, Belgium), P. Porcher (Bellevue, France), A. A. S. Da Gama, G. F. De Sa (Recife, Brazil), W. T. Carnall and G. L. Goodman (Argonne, IL, U.S.A.)

Site-selective excitation of europium luminescence in Eu–EDTA solutions: an investigation of their structural and dynamical properties in the liquid and frozen states 349
J. Dexpert-Ghys and B. Piriou (Meudon, France)

Spectroscopic studies on Pr(III), Nd(III), Er(III) and Tm(III) ions in fluoro-, boro- and acetophosphate glass environments 357
A. S. Kumar and S. V. J. Lakshman (Tirupati, India)

Spectroscopic investigation of the Pr(III) ion in certain ternary sulphate glasses. . . . 363
Y. Subramanyam, L. R. Moorthy and S. V. J. Lakshman (Tirupati, India)

Crystal field effect and paramagnetic susceptibility of rare earth antimonates $Ln_3Sb_5O_{12}$ 369
R. Saez-Puche, C. Cascales, C. M. Marcano, I. Rasines (Madrid, Spain), E. Antic-Fidancev, M. Lemaitre-Blaise and P. Porcher (Meudon-Bellevue, France)

Brillouin scattering investigation of the rare-earth fluorides at high temperatures . . . 375
P. E. Ngoepe (Sovenga, South Africa) and J. D. Comins (Johannesburg, South Africa)

Comments on the role of relativistic crystal field effects with applications to 4f and 3d ion complexes 381
J. A. Tuszynski (Alberta, Canada) and J. M. Dixon (Coventry, U.K.)

Optical studies and microstructure of Eu^{3+} doped fluoroborate glasses containing silver particles. 387
G. F. De Sa, O. L. Malta, W. M. De Azevedo (Recife, Brazil) and H. Dexpert (Orsay, France)

Luminescence and excitation spectra of Ce^{3+}–Tb^{3+} ions co-doped in the $LnMgB_5O_{10}$ system. 393
X.-Y. Ding (Beijing, China)

The effects of some rare earth metals on the catalytic properties of reforming catalysts 399
G.-Z. Zhu, J.-H. Li, Q.-J. Shi and F.-Y. Li (Nanchang, China)

Studies of the surface behaviour and catalytic properties of Pt–Ce–γ-Al_2O_3 405
J.-H. Li (London, Canada), F.-Y. Li, X.-C. Li and L.-T. Luo (Nanchang, China)

Appearance potential study of $Nd_2Fe_{14}B$. 413
A. R. Chourasia and D. R. Chopra (Commerce, TX, U.S.A.)

Studies on higher-derivative absorption spectra of cerium and gadolinium and their analytical applications 421
R. Ying and Y. Yan (Changchun, China)
